INTERNATIONAL SEARCH REPORT

International application No.

PCT/JP2004/010203

Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:

2. ☐ Claims Nos.:
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

The matter common to inventions of claims 1-14 relate to reproduction of a 3-dimensional video based control information for controlling display of 3-dimensional video data and adjustment of a parallax amount on the display screen when the 3-dimensional data is displayed, according to the control information.

(Continued to extra sheet)

1. ☒ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:

4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☒ No protest accompanied the payment of additional search fees.

Continuation of Box No.III of continuation of first sheet(2)

However, the result of the search has revealed that the common matter is not apparently novel since it is disclosed in document JP 08-009421 A (Sanyo Electric Co., Ltd.) 12 January, 1996 (12.01.96), paragraphs 0015 to 0030. As a result, the aforementioned common matter falls within the category of the prior art, and therefore, cannot be a special technical feature in the meaning of PCT Rule 13.2, second sentence.

Accordingly, there exists no matter common to all of claims 1-14. Since there exists no other common matter which can be considered as a special technical feature in the meaning of PCT Rule 13.2, second sentence, no technical relationship between different inventions in the meaning of PCT Rule 13 can be seen. Consequently, it is obvious that the inventions of claims 1-14 do not satisfy the requirement of unity of invention.

Among claims 1-14, the International Search Authority considers the following as a range satisfying the requirement of unity of invention: claims 1-5, 8-12.
